

Brentwood Town Centre Design Plan

William Hunter Way

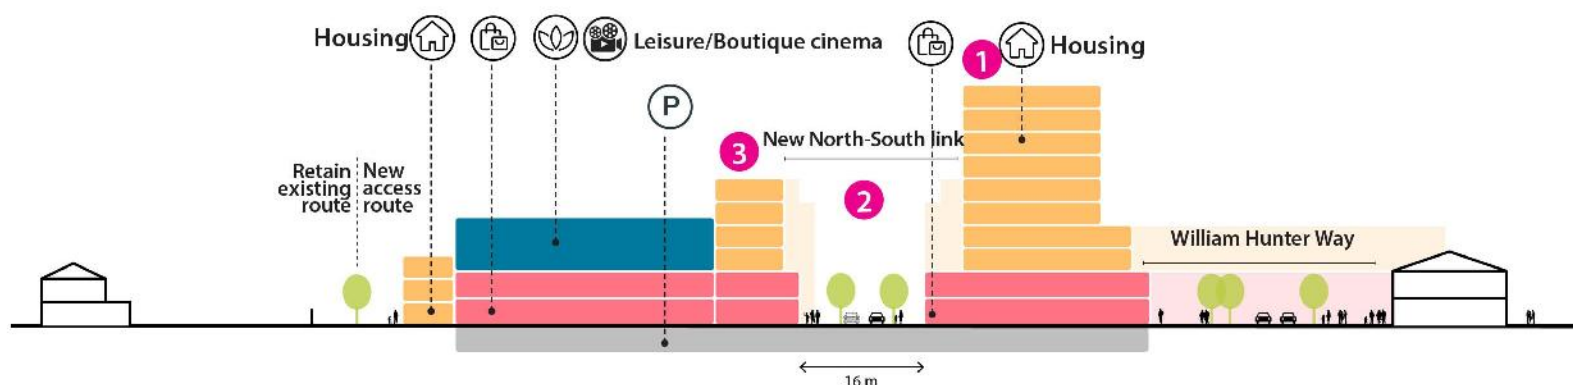

potential: 🏠 179 - 230 🅅 282 - 615 🏢 12206 - 6720 m²

Section A - Residential courtyard blocks with parking podium

Section B - Mixed use blocks along William Hunter Way

The proposed scheme looks at creating activity along William Hunter Way and improving permeability across the site for pedestrians, cyclists and vehicles, especially in a north-south orientation.

The southern edge of the development could be a mix-use development including residential, retail, commercial leisure. Some of the uses that could be incorporated are health & beauty and leisure related activity with a possible boutique hotel.

The northern portion would potentially have a more residential character and scale. The proposed uses shouldn't compete with the existing retail in the Town Centre but compliment them.
