

Recommended Boundary Changes: Ingatestone High Street Conservation Area

The Conservation Area boundary currently cuts across the existing plot boundaries to the south-east of Bell Mead, rather than following features that are visible on the ground.

Recommendation: extend the boundary to take in the existing undeveloped plots running back to the stream. In addition, it is suggested that the plot of woodland beyond Bell Mead is included. This will help to preserve the historic plot boundaries.

What do you think? Please fill in the questionnaire at www.brentwood.gov.uk or use a comment form and let us know your comments by 23rd October.
