1 Background and Government Requirement

PPS3 Requirements

- 1.1 Planning Policy Statement 3 (PPS3): Housing was published in November 2006 and sets out the Government's new and more responsive approach to land supply at the local level. There is a new focus on addressing affordability by increasing housing supply and driving up delivery. A top priority for Government is to ensure that land availability is not a constraint on the delivery of more homes.
- 1.2 PPS3 requires Local Planning Authorities to identify sufficient, specific, deliverable sites to deliver housing over the first five years of the relevant Local Development Document (paragraph 54). Prior to adopting Local Development Documents, the Council must demonstrate an up to date five year supply of deliverable housing. Where authorities cannot demonstrate a five year supply, PPS3 states that they should consider favourably planning applications for housing having regard to the policies contained in PPS3 (paragraph 71).
- 1.3 From 1st April 2007 Local Planning Authorities are required by Government to assess and demonstrate the extent to which existing plans already fulfil the requirement set out in PPS3 to identify and maintain a rolling five year supply of deliverable land for housing (paragraphs 7, 8 and 68-74).
- 1.4 In determining the five year housing land supply, PPS3 states that unless the local planning authority can provide robust evidence of genuine local circumstances that prevent sites being specified, no allowance for windfalls should be included within the supply.

Demonstrating a Five Year Supply of Deliverable Sites

- 1.5 The Department for Communities and Local Government (DCLG) have produced guidance on how to assess a five year supply. The guidance sets out three main stages to consider when assessing supply, as follows:
 1. Identify the housing provision to be delivered over the following five years;
 2. Identify sites that have potential to deliver housing over the five year period, including:
 - a. Housing allocations in the Development Plan,
 - b. Sites that have planning permission (outline or full planning permission that have not been implemented),
 - c. Specific, unallocated brownfield sites that have the potential to make a significant contribution to housing delivery during the five year period; and,
 3. Assess deliverability of potential sites in terms of paragraph 54 of PPS3.
- 1.6 This paper sets out an assessment of whether or not there is a five year supply of deliverable housing land within Brentwood Borough. This is the second such paper to be published, following that at April 2009. This paper sets out the position at April 2010 over the five year period from 2011/12 – 2015/16
- 1.7 Specific sites are identified that the Council considers likely to contribute to the delivery of five years housing provision. Included are sites already under

construction but not yet complete, those with planning permission but where building work has yet to commence; sites allocated in the Replacement Local Plan; and sites that have potential to come forward within the next five years where there is a realistic expectation that development will take place, as identified in the Council's Urban Capacity Study.

2 Sources of Information

Residential Land Monitor

- 2.1 The Residential Land Monitor is carried out annually on behalf of the Council by Essex County Council as part of a Service Level Agreement (SLA) to monitor and review planning permissions within the Borough.
- 2.2 Detailed information provided within the study is required for the purposes of the Annual Monitoring Report (AMR) (see PPG12 paragraphs 2.17-2.23). Information includes all planning applications made within the monitoring year for residential development and lists any residential unit gain or loss. Sites fully completed within the year are removed leaving only those sites which have not started or are under construction for the next monitoring year.

Annual Monitoring Report

- 2.3 The Planning and Compulsory Purchase Act 2004 (The Act) requires every local planning authority to produce an annual report containing information on the monitoring of the current local development plan. AMRs must be submitted to the Secretary of State by the end of the calendar year. By monitoring local development plan policies the Council is able to assess whether housing delivery objectives are being met in line with policy targets.
- 2.4 The Council's sixth AMR was produced for the years 2009/10 in December 2010. The housing section of the report sets out large residential sites completed, those with unimplemented or uncompleted planning permissions, and those with potential as identified in the Urban Capacity Study. The appendices of the AMR show housing trajectories for these sites for the period 2001-2024.
- 2.5 Monitoring new housing delivery is a key core output indicator. Housing trajectories found in the Council's AMR documents have been used in producing this five year housing land supply assessment.

Urban Capacity Study

- 2.6 The previous Planning Policy Guidance Note (PPG) 3 advised that all local authorities should undertake urban capacity studies, which would consider various options in relation to the density of development, mix of house types etc. The Urban Capacity Study is a tool in the Governments 'Plan, Monitor Manage' approach to guide and speed up future housing delivery.
- 2.7 The Brentwood Urban Capacity Study was undertaken in June 2002 (and subsequently updated annually) and assesses the total housing potential of the Borough in order to achieve greater efficiency in the use of Previously Developed Land (PDL) and buildings, and minimise the need for development on greenfield land.

Strategic Housing Land Availability Assessment (SHLAA)

- 2.8 Strategic Housing Land Availability Assessments (SHLAAs) are a requirement set out in PPS3 (Annex C), and are designed to supersede the Urban Capacity Study. According to DCLG practice guidance the primary role of the SHLAA is to:
- Identify sites with potential for housing;
 - Assess their housing potential; and
 - Assess when they are likely to be developed.
- 2.9 The SHLAA should aim to identify sufficient specific sites for at least the first 10 years of a plan (minimum), from the anticipated date of its adoption, and ideally for longer than the whole 15 year plan period. Such an assessment is an important evidence source to inform plan-making, but does not in itself determine whether a site should be allocated for housing development. The assessment should not be a one-off study but updated regularly and form an integral part of the AMR process, although a comprehensive first assessment would need to form the basis.
- 2.10 The Council is currently in the process of completing its first SHLAA, which is due to be completed in early 2011.

3 The Five Year Requirement

- 3.1 On 6 July 2010 the Secretary of State for the Department of Communities and Local Government, announced he was revoking Regional Spatial Strategies (RSS). Following a legal challenge on 10 November 2010, the High Court ruled the Secretary of State's action to be unlawful. The effect of the ruling is to reinstate, for the time being and at the time of writing, the East of England Plan as part of the development plan for the purposes of Section 38(6) of the Planning and Compulsory Purchase Act 2004. The Government still intends to abolish RSSs, however, and has stated that this intention is a material consideration.
- 3.2 If the Government takes forward its intention to abolish RSSs and plans to return decision making powers on housing and planning to local councils, the Council will need to determine the appropriate level of growth in housing numbers that should be provided in the Borough over the local development plan period. This decision will be based on robust evidence and public consultation.
- 3.3 In the absence of any alternative agreed figures this assessment continues to use RSS targets as a basis for housing supply forecasts.
- 3.4 The five year housing requirement is based on the housing provision figure set out in the RSS, the East of England Plan, approved by the Secretary of State in May 2008. The Approved RSS provides for a minimum of 3,500 dwellings (net) to be built between 2001 and 2021, an average of 175 dwellings per year.
- 3.5 Table 1 sets out the housing provision figures as set out in the RSS (2001-2021) and completions to date.
- 3.6 By April 2010, a total of 1,795 dwellings were completed within the Borough. This leaves a residual of 1,705 for the remaining RSS period, thereby requiring a reduced annual average of 155 dwellings.

Table 1: Housing requirement based on the approved RSS 2001-2021

	Number of Dwellings	Average Dwellings Per Annum
RSS Housing Provision 2001-2021	3,500	175
Net Completions 2001-2009	1,795	200
Residual RSS Provision 2009-2021	1,705	155

4 The Five Year Provision Figure

4.1 According to advice published by DCLG in 'Demonstrating a five year supply of deliverable sites', in order to assess the deliverability of identified potential sites, PPS3 (paragraph 54) states three deliverability criteria that any deliverable site should meet:

- Be available – the site is available now;
- Be suitable – the site offers a suitable location for development now and would contribute to the creation of sustainable, mixed communities; and
- Be achievable – there is a reasonable prospect that housing will be delivered on the site within five years.

4.2 The Council's five year provision figure is based on the assessment of potential sites against these three deliverability criteria. The following sets out how different deliverable site circumstances apply to the criteria:

Available Land

- Those sites under construction;
- Sites with a planning permission and/or Local Plan allocation; and
- Where a developer is in ownership of the site or there is known developer interest, or is marketed for sale.

Suitable Sites

- Sites with Planning Permission and/or Local Plan allocation;
- Sites that are on Brownfield land that are allocated or acceptable for residential use; and
- Those sites that have potential to create sustainable and mixed used communities.

Achievable Sites

- A site that is under construction;
- Sites with no known ownership constraints;
- Sites where there are no known physical or environmental constraints; and
- There are no planning conditions or section 106 agreements limiting development within the five year period.

4.3 The five year period is taken as the period beginning 1 April for the forthcoming year at the time of the assessment. Therefore, the current five year period is 1 April 2011 to 31 March 2016. The schedule of housing sites in Appendix A provides details of sites that make up the five year supply of deliverable sites. The schedule is summarised in Table 2 and includes sites which are either allocated in the

Replacement Local Plan, have planning permission and are not yet recorded as fully completed (i.e. not started or under construction), and other sites without planning permission but where there is an expectation that development will occur in the next five years in accordance with local plan policies.

Table 2: Summary of identified sites

	2011/12	2012/13	2013/14	2014/15	2015/16	Total
Extant Planning Permissions on Allocated Sites	85	152	100	50	53	440
Extant Planning Permissions on Unallocated Large Sites	113	52	0	0	0	165
Extant Planning Permissions on Small Sites	53	26	30	6	0	115
Residual Allocated Sites	0	0	0	0	0	0
Contingent/Strategic Sites	0	0	20	21	35	76
Total	251	230	150	77	88	796

- 4.4 Table 2 makes no allowance for windfalls, or small Brownfield sites without planning permission, in the calculation of the five year supply of 796 dwellings. PPS3 states that windfalls should not be included in the study. However, windfalls have been a continuous supply of housing in the Borough for a number of years and are expected to contribute additional housing supply in the future. Based on historic figures for both small windfall completions it is considered justifiable to include 48 dwellings on windfall sites in the final year of the five year supply (2015/16), at which time it is projected that existing small site planning permissions would have been completed. Clearly further permissions will be granted on sites as yet unidentified (windfalls) and therefore it is estimated that taking into account this as yet unidentifiable supply, the total five year supply would be 844 dwellings.

How Many Years Deliverable Land?

- 4.5 Brentwood Borough has an overall amount of identifiable and deliverable housing land supply for 796 dwellings over the next five years. That is 21 dwellings more than the current RSS five year requirement (3%). This equates to a housing land supply of 5.13 years as set out in Table 3.
- 4.6 If account is taken of windfall supply, the total would be 844 dwellings, which is 69 dwellings more than the current requirement (9%) and equates to a housing land supply of 5.45 years.

Table 3: Summary of five year deliverable housing supply – 1 April 2011 to 31 March 2016

Approved RSS five year requirement	775 dwellings
Approved RSS annual average residual requirement	155 dwellings
Total identifiable five year supply	796 dwellings
Annual average supply	159 dwellings
Excess supply over requirement for five year period	21 dwellings
How many years housing supply?	5.13 years

5 Conclusion

- 5.1 The assessment set out in this paper shows that the Borough can demonstrate a five year deliverable supply of housing.
- 5.2 In line with national guidance this study will be revised and updated every 12 months, linked to the AMR.

Appendix A: Schedule of Housing Sites

Planning application ref	Type of permission (full, outline, reserved matters, allocation)	Site name/address	Site size	Greenfield/Brownfield	Total number of dwellings with planning permission/site capacity	Potential losses	Net completions as at 1 April 2010	Total net residual number of dwellings under construction or not started as at 1 April 2010	2010/11 forecast completions	Number of residual dwellings expected to be completed in five year period from 1 April 2011	2011/12	2012/13	2013/14	2014/15	2015/16
